# Learning Management Systems

## **Overview**

Learning Management Systems(LMS) enable educational institutions and corporate to bring in the innovative learning methodologies. Educators can create online courses and the learners can enroll into the courses and learn anytime, anywhere.

Ubercore currently offers open source, free software called "Moodle" which is used by millions of users across the world. We also conduct workshops and training sessions for educators and learners about the usage of Moodle.

We also provide other learning management systems and student information systems or build a custom software according to the needs of our clients.

## **Challenge**

Learning management systems are often use a lot of computing resources. These large software need to be hosted on a reliable, always available cloud.

### **Key Challenges:**

1. High compute usage
2. Large storage requirements
3. High bandwidth requirement
4. Often difficult to configure

## **Solution**

### **Moodle learning management system**

Moodle is an open source, free software developed by the community which will meet the requirements of almost all educational institutions. It is used and trusted by thousands of educational institutions across the globe.

### **Cloud hosted servers**

The software is hosted on a secure Ubercore cloud server in the farm which also hosts the Bidar district police websites.

### **Workshops and training**

Our dedicated team will support you throughout the implementation of the project. We conduct hands on workshops for the educators on using the Moodle site.

### **Benefits**

- ✓ Feature rich software
- ✓ Stable and secure
- ✓ Used by millions
- ✓ Free and open source software
- ✓ Highly experienced trainers
